Training Announcement

Crash Data Retrieval Technician Course Level I & II (CSI approved)

These courses are best suited for field investigators, insurance investigators & adjusters, or those involved in vehicle documentation and examinations. They offer the attendee insight into the basic operation and use of the Bosch Crash Data Retrieval (CDR) System.

The Level I course is introductory level training which exposes the Crash Data Retrieval System user to the basic functions of the Bosch CDR system so that, at a minimum, the user can confidently image and preserve data from supported vehicles using the standard OBD II (DLC) port, or in some cases directly from the airbag control module (ACM). Upon successful completion of the Level I course the attendee will be recognized as a Basic CDR Technician.

The Level II course is the hands-on extension follow up to the Basic CDR Technician (Level I) course. It offers individual or small group guided instruction in the following:

- ◇ In vehicle DLC data imaging
- ◇ Module location and identification
- ◇ Direct-to-module data imaging
- ◇ Practical booster and adaptor applications (ACM, PCM)
- ◇ "Back powering" airbag control modules to allow in vehicle DLC data imaging

Attendees are not required to own the Bosch CDR System, although it is strongly encouraged.

These courses are designed so those who don't yet own a system will have a better understanding of this evolving technology and benefit from the information.

This hands on instruction and subsequent evaluation by a Trainer/Mentor completes the CDR Technician Level certification

The Level I & II Technician courses do **not** go into any analysis of the imaged data. Both courses are the basis for, and are a required prerequisite for, the CDR Data Analyst's course.

Note: Each student in the Level II course receives a re-powering rig, a \$35 value

- ◆ **Dates:** Thur. February 16th, 2012 (Level I)
Friday, February 17th, 2012 (Level II)
- ◆ **Location:**
Baldwin Park Police Department
14403 E. Pacific Avenue
Baldwin Park, CA 91706
Local contact for travel/lodging inquiries:
Det. Ted Espanto
