

Vista FX the most revolutionary 3D diagramming software ever created.

May 15, 2004

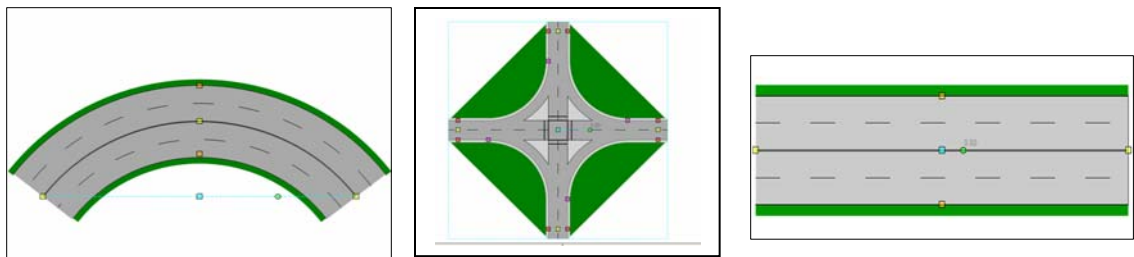

VS Visual Statement Inc. announces that Vista FX – the newest version of its powerful diagramming tools – is available today for direct purchase through its online store or from one of its professional State Representatives across North America, Australia, New Zealand, and the Middle East. Delivering a powerful combination of robust features, suite-wide enhancements to its 3D engine, and new functionality to increase users' productivity, Vista FX fulfills the market's demand for a feature-rich, value-priced, diagramming solution that allows for rapid diagramming and advanced collision analysis in the same bundle.

Vista FX has been completely redeveloped to take advantage of the new Microsoft .NET Framework. The .NET Framework within Vista FX offers our users base direct updater services, and has allowed VS to create its own native drawing engine and allowing for greater control and rapid development response to user needs. The software includes new templates with the ability to create your own from existing diagrams or city engineering files. These elements, coupled with Vista's flexible licensing terms and expanded support options, provide users with a choice they can trust.

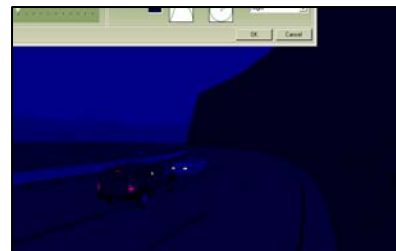

"The release of Vista FX signals a new era in collision and crime scene reconstruction for one of the world's number one diagramming solutions," said Mike Kennedy, CEO of Visual Statement. "With the support of over 3500 Law enforcement agencies and thousands of private companies worldwide VS Investigator 2005 suite is the clear choice for value-conscious consumers, looking for either, a rapid diagramming solution, or an in-depth tool set for the professional reconstrucionist."

Focus On Users

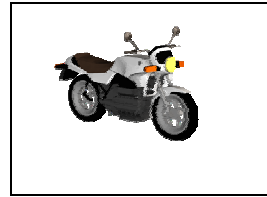

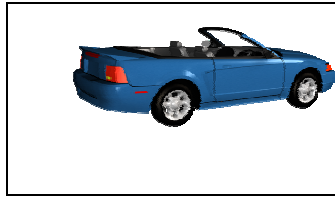

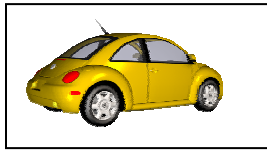

- **Rapid Diagramming:** Vista FX's new rapid diagramming features give users 3 different ways to create accurate diagrams quickly and efficiently. Vista FX has introduced the SmartRoads tool to complement the upgraded Scene Wizard and Template option. Drag and drop objects that allow users to dynamically change the objects properties through direct manipulation of control grips; intersection object, straight road object, and the curved road object.

- **Enhanced interface:** Streamlines work flow making it easy to find and accomplish frequently used tasks. Objects can now be directly manipulated (stretched, rotated, moved) via control grips. Right click allows quick access to critical object and scene properties. 3D objects come with a preview widow for instant viewing of adjustments.
- **3D included in all Suites:** Vista FX 3D engine is now integrated with all of our VS Investigator 2005 suites. Features include a greatly expanded object library, new scene backdrops, real time manipulation of environmental settings such as; fog and sun position, multiple cameras, ground plane enhancements. Vista FX also incorporates greater control over vertical position of objects allowing for elevated mountains, overpass, and

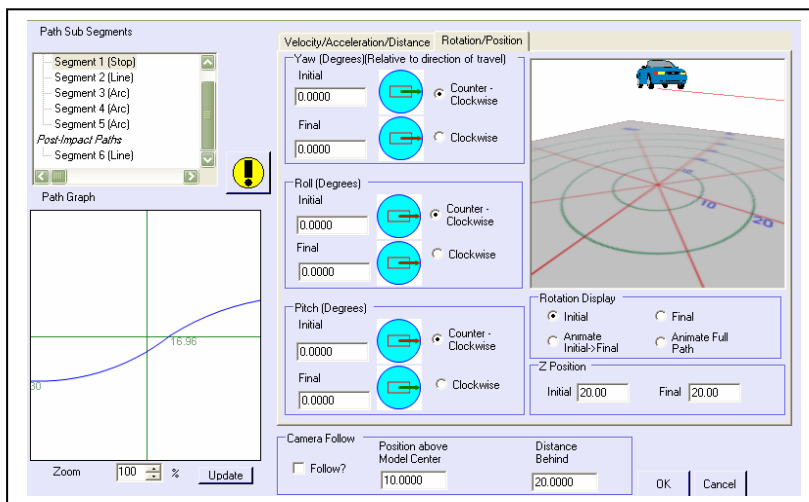

- **New Detailed models:**

- **Measurement logs:** Vista FX accepts Direct download from most popular Total Stations. Improvements to the log include; ability to set origin to 0, user specified description for points, ability to close lines and expanded options for line styles.

[real time full motion animation]

Vista FX seamlessly integrates with our revolutionary 3D animation software. Built in previews of animation states and paths help users quickly construct accurate animations with out having to render first.

RealMotion 3D allows anyone that can create a diagram in Vista to instantly create a 3D animation. Create powerful real time animations by simply dragging the animation paths, set the speeds or accelerations, and RealMotion does the rest. We guarantee that you can create your first 3D animation within one hour or we will refund your purchase.

Still not convinced?

Let us take you on a live screen to screen demonstration of the actually software in action. We will show you how it will meet the needs you have today and the ones you might have down the road.

Call Toll free and book an online demonstration today. You will be amazed with the new power of Vista FX. 1.888.828.0383
